About Us

About Us

At Aragon Arms, we have been producing high-quality and innovative products, drawing on the experience we've gained since the 1980s. Since 2020, we have been exporting and offering long-lasting, reliable solutions to our customers. With our commitment to producing durable and safe equipment, we continue to strengthen our position in the industry.

SEMI AUTO

SEMI AUTO

ARX4-F BLACK

This 12-gauge semi-automatic shotgun features an advanced auto gas-regulating piston system, allowing seamless use of both light and heavy loads without requiring modifications. This system reduces recoil by 20-30% compared to conventional shotguns, ensuring smoother operation and less strain on the shooter. It also requires significantly less maintenance, making it highly efficient in demanding conditions.

Built for durability, the shotgun boasts oxidation-proof, chrome-plated barrels made from 4140 steel, all of which are proof tested for reliability. It comes with options for a slug barrel or a 3-choke system (Full, Modified, Cylinder) to cater to various shooting preferences. The non-slip ergonomic grip enhances control and comfort during operation.

Offered with magazine capacities of 5+1 and 7+1, this shotgun is also fully compatible with Benelli M4 parts and accessories. The telescopic stock and adjustable cheek riser provide superior ergonomics for any shooter, while ghost ring sights improve target acquisition and enable faster follow-up shots, making this shotgun an ideal choice for tactical, home defense, or competition use.

Various Coating Options for All Parts and Firearms

We offer a range of coating options for all parts and firearms: Anodize, Cerakote, and Hydro Dipping. Each coating method enhances durability and provides an aesthetic finish.

Anodize: Improves resistance to wear and corrosion on metal surfaces.

Cerakote: High-performance ceramic coating that delivers excellent protection and durability.

Hydro Dipping: Allows for the application of complex patterns and colors to metal surfaces.

For detailed information and custom requests, please contact our export team.

BULLBUP

MAGAZINE-FED

BLP BLACK

This 12-gauge magazine-fed bullpup shotgun features a synthetic lower receiver and synthetic forend, offering both aesthetics and durability. The barrel, made from 4140 drilled steel, is extra-lightweight and equipped with a gas-operated system, providing excellent control and reduced recoil. Thanks to the bullpup design, with the magazine positioned at the rear, the overall length of the shotgun can be up to 25% shorter compared to other shotguns in countries with a 47 cm / 18.5-inch barrel length requirement, as the body size decreases while the barrel extends.

Its ergonomic and compact design allows for comfortable and precise shooting in any tactical scenario. The lightweight construction and reliable performance make it an effective solution in both rapid-fire situations and challenging conditions. This shotgun delivers superior performance and versatility for both hunting and tactical applications.

AOU-2801

NICKEL

This 28-gauge over/under shotgun combines classic aesthetics with practical functionality, making it ideal for various hunting applications. Featuring a beautifully crafted Turkish walnut stock and forearm, this shotgun offers a balance of elegance and durability. The natural wood grain provides a timeless appearance while ensuring a comfortable grip during extended use.

Designed without ejectors, it offers a more traditional shooting experience. Its precise craftsmanship and reliable break-action mechanism allow for smooth operation and consistent performance in the field. Whether you're an experienced hunter or new to the sport, this shotgun is a dependable and stylish choice for any shooting scenario.

SINGLE BARREL

SINGLE BARREL

ASB-S4101

NICKEL

This .410-gauge single-barrel shotgun combines durability and lightweight construction with its synthetic stock and forearm. The synthetic material offers extra resistance to harsh weather conditions and minimizes maintenance, making it a reliable long-term option. The single-barrel design emphasizes simplicity and reliability, providing users with a quick and easy operation. Its lightweight structure makes it easy to carry during long hunting days, while also offering a balanced shooting experience. This shotgun is an ideal choice for hunters who spend extended time in the field, thanks to its durable build, lightweight design, and ease of handling.
